

BONGO XAVIER

Computer Science Major | Software & Systems Development

Kampala, Uganda

Phone: +256 700158408

Email: bongoxavier89@gmail.com

GitHub: bongoxavier

PROFILE

Computer Science major with a strong interest in software development, computer systems, cybersecurity, networking, and data structures. Experienced with C programming, web development, networking concepts, and practical technology projects. Particularly interested in low-level programming, systems development, cryptography, and security. Currently developing a strong foundation in algorithms, dynamic memory management, data structures, and software engineering.

EDUCATION

Makerere University — Kampala, Uganda

Bachelor of Science — Computer Science

2025 | 2029

Relevant coursework:

- Data Structures and Algorithms
 - Computer Organization and Architecture
 - Operating Systems
 - Computer Networks
 - Object-Oriented Programming
 - Systems Analysis and Design
 - Linear Algebra
 - Calculus
 - Foundations of Mathematics
-

TECHNICAL SKILLS

Programming:

C, C++, Java, Python, JavaScript

Web Development:

HTML5, CSS3, JavaScript, Bootstrap, Node.js, Express.js

Computer Science:

Data Structures, Algorithms, Dynamic Memory Management, Object-Oriented Programming, Operating Systems, Computer Architecture, Networking

Networking:

IPv4, Subnetting, DHCP, Routing, Cisco Packet Tracer

Tools & Technologies:

Git, GitHub, GCC, Arduino, ESP32, XAMPP

Areas of Interest:

Cybersecurity, Cryptography, Systems Programming, Operating Systems, Computer Networks, Low-Level Programming

PROJECTS

Personal Portfolio Website

Designed and developed a personal website to showcase academic background, technical skills, projects, and professional development.

Technologies: HTML, CSS, JavaScript, Bootstrap

Logistics Operations Dashboard

Developed concepts and web interfaces for tracking logistics operations, documents, cargo information, and operational status.

Technologies: HTML, CSS, JavaScript, Bootstrap

Smart Farming / Plant Disease Detection

Worked on an IoT-oriented agricultural technology concept involving sensors and drone-based data collection for plant monitoring and disease detection.

Technologies: ESP32, Sensors, IoT

Automatic Egg Incubator

Developed an embedded systems project focused on automating temperature and environmental control for egg incubation.

Technologies: Arduino, Sensors, Embedded C/C++

Smart Traffic Light System

Designed an automated traffic-light control system using a microcontroller and programmable timing logic.

Technologies: Arduino, Embedded C/C++

EXPERIENCE

DTS Global Logistics — Operations Team

Operations / Technical Support | [Dates]

- Captured and maintained logistics and cargo documentation.
 - Generated T1 transit documentation and supported container manifest preparation.
 - Tracked cargo movement and UNBS release processes.
 - Worked with operational data and documentation workflows.
 - Explored digital solutions for improving logistics tracking and operational efficiency.
-

ACADEMIC & TECHNICAL DEVELOPMENT

- Practicing advanced C programming, including dynamic memory allocation and data structures.
 - Developing proficiency in linked lists, stacks, queues, sorting algorithms, and memory management.
 - Building foundations in computer networking and systems programming.
 - Developing web applications using front-end technologies and JavaScript-based backends.
 - Exploring cybersecurity, cryptography, operating systems, and low-level computing.
-

SOFT SKILLS

- Problem Solving
- Logical Reasoning
- Independent Learning
- Technical Research
- Team Collaboration
- Analytical Thinking
- Project Development
